## SUMMARY

As a recent graduate with practical experience as a Software Engineer Trainee, I'm eager to bring my skills and enthusiasm to a dynamic and forward-thinking company. I'm passionate about learning and contributing, while also growing both personally and professionally in a collaborative environment.

---

## PROJECTS

### Online Document Request System for OLFU Registrar Office

CAPSTONE

- Developed an Online Document Request System to streamline document requests and improve efficiency.
- Enabled online document requests with personal information and purpose submission.
- Implemented appointment scheduling for efficient management and approval of requests.

### Suite View

OJT

- Worked on revamping Cloudstaff's Suiteview, a camera monitoring system capturing images every minute and storing them in AWS S3.
- Developed JSON APIs to retrieve stored images for frontend display.
- Created functionality to compile hourly images into videos.
- Tested and validated APIs using Postman

---

## WORK EXPERIENCE

### Associate Software Engineer Trainee / Cloudstaff Inc.

Feb 2023 - May 2023

- Completed foundational bootcamps in Angular, SQL, Git, and Postman; applied knowledge in web development projects with Angular and PHP Lumen.
- Gained hands-on experience with AWS S3 and developed backend APIs for the Suiteview project.
- Cultivated soft skills such as adaptability, problem-solving, effective communication, and teamwork through collaboration on real-world projects.

---

## EDUCATION

### Bachelor of Science in Information Technology

2019 - 2023

Our Lady of Fatima University - Pampanga

---
